I. Introduction

The issue in this proceeding is whether Respondent Hapag-Lloyd AG (hereinafter, “Respondent” or “Hapag-Lloyd”) violated section 41102(c) of the Shipping Act of 1984, as amended (the “Act”), 46 U.S.C. §41102(c), by failing to establish, observe and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing, or delivering property. As demonstrated below, there has been no such violation.

As an initial matter, Hapag-Lloyd has adopted a reasonable policy. The Bureau of Enforcement’s (“BOE”) arguments to the contrary are based on a misunderstanding of an incomplete version of the facts. BOE’s proposed findings of fact omit critical information that undermine its position. The facts also show that Hapag-Lloyd applied this just and reasonable policy to the containers identified in the Order of Investigation and Hearing (“Order”). Finally, extenuating factors that are to be considered in assessing the reasonableness of a carrier’s practices, including the failure of the motor carrier to comply with its customary obligations with respect to container return, further support Hapag-Lloyd’s position. In light of all factual information properly considered, there has been no violation of the Shipping Act.

Even if there has been violation, the penalty proposed by BOE is excessive and not supported by the factors the Commission is required to consider when assessing a penalty. BOE seeks imposition of a penalty of \$16,500,000 based on charges of \$8,125 assessed against 11 containers. These detention charges were never paid by the motor carrier, never passed on to the motor carrier’s customer, and have not resulted in any harm to anyone. These charges have not

adversely impacted the supply chain and imposition of a significant penalty in this case will do nothing whatsoever to address supply chain congestion.¹

However, before addressing the merits of the Section 41102(c) issue, it is necessary to address two preliminary legal issues.

II. The Proceeding Should Be Discontinued On Legal Grounds

The proceeding should be discontinued as to one or both respondents on legal grounds.

A. Commission Lacks Personal Jurisdiction Over Hapag-Lloyd (America) LLC

Because respondent Hapag-Lloyd (America) LLC is not a regulated entity subject to the Act, this proceeding must be dismissed as to Hapag-Lloyd (America) LLC due to a lack of personal jurisdiction.

The plain language of Section 41102(c) of the Act limits its application to common carriers, marine terminal operators and ocean freight forwarders. 46 U.S.C. 41102(c). BOE has stipulated that Hapag-Lloyd (America) LLC does not fall into one of these three categories. See, Joint Stipulation of Facts, filed with the FMC on March 18, 2022. Accordingly, Hapag-Lloyd (America) LLC should be dismissed as a respondent due to lack of personal jurisdiction.

B. The Proceeding Should Be Discontinued As To Both Respondents Because BOE Has Failed To Establish A Prima Facie Case

Because BOE has failed to provide any evidence whatsoever of a factual predicate necessary to establish a violation of Section 41102(c), this proceeding should be discontinued as to both respondents.

¹ Respondents continue to maintain that the statement regarding the impact of a ruling in this case on the supply chain is incorrect and evidences a pre-determination of this case by the Commission. Respondents expressly reserve the right to appeal the ruling denying them an opportunity to depose a representative of the Commission on this issue, and to raise the issue of bias on appeal.

BOE acknowledges in its brief that this proceeding requires the resolution of novel legal issues. One such issue involves the elements the complainant must prove to establish a violation of Section 41102(c) in connection with the assessment of detention. Respondent maintains that in order to establish that detention was improperly assessed in violation of the Act, the complainant (in this case BOE) must establish that the container or containers on which detention was assessed were in fact empty and available for return to a marine terminal. Absent such proof, cargo interests and motor carriers could escape the payment of detention by “demonstrating” that no appointments were available to return a container that was in fact still sitting loaded at the consignee’s facility. The standard of proof in detention cases should not enable unscrupulous operators to extend free time undeservedly and thwart the incentive principle of the interpretative rule.

In this regard, BOE has offered no proof that any of the eleven (11) containers identified in the Order were in fact empty and available for return to a marine terminal. RPFF#34. Moreover, when Respondent sought evidence of instructions received by GSL for the return of the empty containers (See Respondent’s Exhibit A hereto, the subpoena issued to GSL by Respondents), the only documents produced were the empty return matrices of the ocean carrier. GSL produced no documents evidencing instructions from its customer to return the container, despite the fact that such instructions are typically issued by email. BOE Exhibit B, p. BOE 000045.

Given that there is no evidence that the containers in question were in fact empty and ready to be returned, there cannot be a prima facie case that Section 41102(c) has been violated. Accordingly, this proceeding should be dismissed.

III. The Burden Of Proof Is On BOE

In the event the proceeding is not dismissed on one or both the grounds set forth above, it must be remembered that the burden of proof is on BOE.

In proceedings before the Commission, complainants have the burden of proving that a respondent violated the Shipping Act by a preponderance of the evidence. See 5 U.S.C. § 556(d) (“Except as otherwise provided by statute, the proponent of a rule or order has the burden of proof.”); 46 C.F.R. § 502.203. The complainant must provide “an amount of information that would persuade a reasonable person that the necessary premise is more likely to be true than to be not true.” *AHL Shipping Co. v. Kinder Morgan Liquids Terminals, LLC*, FMC No. 04-05 (ALJ June 13, 2005). Additionally, in instances in which BOE is the complaining party and cites multiple instances of alleged violations by a respondent, BOE has the burden of proving each element of a violation with respect to every alleged occurrence of the violation. See *Euroussa Shipping, Inc., Tober Group, Inc., and Container Innovations, Inc., Possible Violations of Section 10 of the Shipping Act of 1984 and the Commission’s Regulations at 46 C.F.R. § 515.27*, 2009 FMC LEXIS 38, *32-33 (stating that Administrative Procedure Act and Commission precedent require a “shipment-by-shipment analysis” when evaluating individual alleged violations).

IV. Respondent’s Reply To BOE’s Proposed Findings of Fact

BOE PFF1. The Federal Maritime Commission issued its interpretive rule regarding detention and demurrage on April 28, 2020. 46 C.F.R. § 545.5(a); See also Interpretive Rule, 85 Fed. Reg 29638.

Admitted.

BOE PFF2. The Interpretive Rule was published in the Federal Register on May 18, 2020. Interpretive Rule, 85 Fed Reg at 29638.

Admitted.

BOE PFF3. Hapag-Lloyd was a regulated entity of the FMC on April 28 and May 18, 2020 and was made aware of the interpretive rule and had knowledge of its contents. BOE Exhibit E, Response of Hapag-Lloyd, A.G. and Hapag-Lloyd (America) LLC to Bureau of Enforcement's First Request for Admission (Hapag-Lloyd RFA).

Admitted as to Hapag-Lloyd AG. Denied as to Hapag-Lloyd (America) for the reasons set forth in Section II.A above.

BOE PFF4. Hapag-Lloyd was aware of the Interpretive Rule for at least one year before the present controversy occurred in the Spring and Summer of 2021. Investig. & Hr'g at 4.

Admitted.

BOE PFF5. Hapag-Lloyd, AG is a vessel-operating common carrier (VOCC) headquartered in Hamburg, Germany at Postfach, 102626, Ballindamm 25, 2000 Hamburg 1, Germany. Investig. & Hr'g at 2-3.

Admitted.

BOE PFF6. Hapag-Lloyd (America) LLC operates as Hapag-Lloyd AG's agent in the United States and has offices at 5515 Spalding Drive, Peachtree Corners, GA 30092. BOE Exhibit F, Resp. of Hapag-Lloyd, A.G. and Hapag-Lloyd (America) LLC to Bureau of Enforcement's Third Interrogs. Request for Production of Documents at 1, FMC Docket No. 21-09.

Admitted.

BOE PFF7. Hapag-Lloyd AG is a common carrier as defined by 46 U.S.C. § 40102(7). BOE Exhibit E, Hapag-Lloyd RFA at 1.

Admitted.

BOE PFF8. Hapag-Lloyd AG provides ocean transportation for property to and from LALB and foreign countries. Id. at 2.

Admitted.

BOE PFF9. Hapag-Lloyd AG receives, handles, stores and delivers property at West Basin Container Terminal (WBCT); TraPac Terminal, LLC (TraPac); Yusen Terminals LLC (YTI); SSA Terminal at Pier A (Pier A); International Transportation Service, Inc.; and Total Terminals, Inc. (TTI). Id. at 3.

Admitted.

BOE PFF10. Hapag-Lloyd AG discharges property and/or collects empties related to such cargo and property at: WBCT; TraPac; YTI; Pier A; International Transportation Service, Inc.; and TTI. Id.

Admitted.

BOE PFF11. Hapag-Lloyd AG provided ocean transportation for the following eleven cargo containers (the Containers):

Container Number

GESU3644906
TEMU1467361
FFAU2104882
FFAU2094681
SEGU5670431
HLBU1593348
HLXU9003126
HLBU8048860
HLBU8039554
HLBU8038687
HAMU1302165

Id. at 2.

Admitted.

BOE PFF12. Golden State Logistics (GSL) is a motor carrier company that is not regulated by the Commission. BOE Exhibit B, Cruz Dep. Tr. at 13–14.

Respondent denies that the cited transcript supports this conclusion.

BOE PFF13. GSL provided ground transportation for the Containers. Id. at 22.

Admitted.

BOE PFF14. For each of the Containers, GSL attempted to make an appointment to return the empties to Hapag-Lloyd after being notified by their customer that the empty was ready. Id. at 21, 22–23.

Admit that GSL indicated that this is its typical practice, but deny that the deposition transcript established this fact with respect to the containers covered by the Order.

BOE PFF15. While attempting to return each of the Containers, GSL was met with difficulties in obtaining appointments. Id. at 23.

Admit that GSL testified that it had difficulty obtaining appointments, but deny that the deposition transcript established this fact with respect to the containers covered by the Order.

BOE PFF16. At Hapag-Lloyd's direction, GSL attempted to return the Containers at the following marine terminals: WBCT; TraPac; YTI; Pier A. Id. at 24–28; see also BOE Exhibit M, Hapag-Lloyd Dispute Screenshots.

Denied. BOE Exhibit M reflects screenshots which purport to show the terminals GSL was monitoring for appointments. There is no evidence in the record as to where GSL actually attempted to return the containers. Further denied that the empty return matrix

issued by Hapag-Lloyd constitutes instructions to return containers to the terminals listed therein. See, Affidavit of Sandeep Govil, attached hereto as Exhibit B (“Govil Aff.”), ¶ 16.

BOE PFF17. Hapag-Lloyd (America) LLC, serving as Hapag-Lloyd AG’s agent, issued the following detention invoices to GSL on behalf of Hapag-Lloyd AG and held them valid after GSL disputed them:

No.	Container Number	Invoice No.
1	GESU3644906	2119642180
2	TEMU1467361	2119704796
3	FFAU2104882	2119711233
4	FFAU2094681	2119721993
5	SEGU5670431	2119731378
6	HLBU1593348	2119739508
7	HLXU9003126	2119739508
8	HLBU8048860	2119741085
9	HLBU8039554	2119748477
10	HLBU8038687	2119748477
11	HAMU1302165	2119752845

BOE Exhibit E, Hapag-Lloyd RFA at 3.

Admitted.

BOE PFF18. GSL has not paid the above invoices. BOE Exhibit B, Cruz Dep. Tr. at 23.

Admitted.

BOE PFF19. GSL has not billed these invoices to their customers. Id. at 24.

Admitted.

BOE PFF20. Hapag-Lloyd directed GSL via e-mail where to return the Containers. Id. at 26.

Denied. The deposition transcript does not support this statement. See also Govil Aff., ¶16.

BOE PFF21. More specifically, Hapag-Lloyd gave GSL an “empty broadcast”, which is a chart with instructions about where to return/terminate certain sized containers. Id. at 34.

Admit GSL was provided with a chart. Deny that the chart constitutes instructions on where to return the containers. Govil Aff., ¶ 16.

BOE PFF22. After receiving the “chart,” GSL attempted to make appointments to return the Containers according to Hapag-Lloyd’s instructions. Id. at 28.

Denied. The deposition transcript does not support this statement, nor does BOE Exhibit M. The screenshots in Exhibit M reflect information in the system GSL used to look for available appointments. These screenshots do not constitute evidence of attempts to make appointments, which had to be done through actual terminal websites. BOE Exhibit G, pp. BOE000152 and 000153.

BOE PFF23. The chart specified information as to container and location, GSL understood it to mean that they would be able to return the Containers at the locations specified by Hapag-Lloyd. Id. at 34–35.

Admitted as to GSL’s understanding, but denied as to GSL’s understanding being an accurate understanding of the chart. Govil Aff., ¶16.

BOE PFF24. For example, if an empty broadcast chart specified that “20-foot dry containers, single” could be returned at Pier A or TraPac, GSL understood that to mean they could return an empty 20-foot dry container at Pier A or TraPac under a single transaction. Id. at 34–35; 37.

Admitted as to GSL’s understanding, but not as to the truth of that understanding. Govil Aff., ¶16.

BOE PFF25. To return the Containers at the directed terminals, GSL used third-party data information systems to broadly check appointment availability at those terminals. Id. at 40.

Admitted as to GSL’s use of a third-party data system to check for appointment availability. Deny GSL used multiple systems to “broadly” check appointment availability,

as neither the use of multiple systems nor the concept of “broadly” checking is supported by the deposition transcript. No contrary evidence is necessary.

BOE PFF26. The third-party data information is a chart (Appointments Chart) that displayed the LALB MTOs and their appointment availabilities. Id.; see also BOE Exhibit G, Gabriel Padilla Demo. Session at 3.

Denied. Respondent objects to the admission into evidence of the so-called Padilla Demonstration and the two verified statements of Mr. Padilla (the “Padilla materials”) on the grounds that they are hearsay. Respondent also objects to any reliance on these materials. Accordingly, Respondent denies any allegation based on any of the Padilla materials. Further, Respondent denies that the Appointments Chart lists all MTOs in Los Angeles/Long Beach.

BOE PFF27. To demonstrate GSL’s difficulties in obtaining appointments to return the Containers, GSL presented the Appointments Chart to show the lack of appointments. BOE Exhibit E, Hapag-Lloyd RFA at 3.

Admitted.

BOE PFF28. The Appointments Chart is an aggregate of appointment data directly “scraped” from MTO websites. Cruz Dep. Tr. at 40–41; see also BOE Exhibit G, Gabriel Padilla Demo. Session at 3–5.

Admitted based on Cruz deposition transcript only. Respondent renews its objection to the Padilla materials.

BOE PFF29. The Appointments Chart is updated every five minutes. BOE Exhibit B, Cruz Dep. Tr. at 41; BOE Exhibit G Gabriel Padilla Demo. Session at 19

Denied. The deposition transcript does not support this statement. Respondent renews its objection to the Padilla materials.

BOE PFF30. The Appointments Chart allows motor carriers to check all available terminal appointments at different MTOs faster than if they were to individually sign on to each MTO website and check for appointments. BOE Exhibit B, Cruz Dep. Tr. at 41, 62; BOE Exhibit G, Gabriel Padilla Demo. Session at 3–5.

Admitted based on Page 62 of the Cruz Dep. Page 41 of the Cruz deposition transcript does not support this statement. Respondent renews its objection to the Padilla materials.

BOE PFF31. Although terminal appointments are dynamic, the Appointments Chart presents an expeditious overview of MTO appointments as it would be impossible for motor carriers to sign into each MTO website and check appointment availability within the amount of time the Appointment Chart updates itself. BOE Exhibit B, Cruz Dep. Tr. at 62.

Denied. This PFF represents BOE’s characterization of the testimony, rather than a fact. The deposition transcript does not contain this statement.

BOE PFF32. The Appointments Chart is demonstrative of the lack of appointments when GSL tried to return the Containers. Id. at 40–50.

Denied. The deposition transcript does not support this statement. Moreover, information provided by GSL demonstrates that appointments to return some of the Containers were available on certain dates. RPFF#27.

BOE PFF33. To make an appointment, motor carriers must go directly to an MTO platform (or website) to secure an appointment. BOE Exhibit C, V.S. Gabriel Padilla at 3; BOE Exhibit D, Second V.S. Gabriel Padilla at 2; BOE Exhibit H, Napoli Dep. Tr. at 5.

Denied. The Napoli deposition transcript does not support this statement.
Respondent renews its objection to reliance upon any of the Padilla materials.

BOE PFF34. Appointments are only able to be booked two to five days in advance, depending on the MTO, type of container, and day of the search. BOE Exhibit C, V.S. Gabriel Padilla at 3; BOE Exhibit D, Second V.S. Gabriel Padilla at 3; BOE Exhibit H, Napoli Dep. Tr. at 11–12.

Denied. See response to BOE PFF33.

BOE PFF35. VOCCs, such as Hapag-Lloyd, direct MTOs as to the vessel load projections and then the size and type of containers able to be received. BOE Exhibit C, V.S. Gabriel Padilla at 3; BOE Exhibit D, Second V.S. Gabriel Padilla at 1; BOE Exhibit H, Napoli Dep. Tr. at 9–10.

Denied. See response to BOEPFF33 and 34.

BOE PFF36. This information is communicated daily. BOE Exhibit C, V.S. Gabriel Padilla at 1; BOE Exhibit D, Second V.S. Gabriel Padilla at 1; BOE Exhibit H, Napoli Dep. Tr. at 9–10.

Denied. See response to BOEPFF 33, 34, and 35.

BOE PFF37. Although appointment allocation limits are ultimately controlled by MTOs, VOCCs control if and when the MTO can receive the VOCC's empty equipment. BOE Exhibit C, V.S. Gabriel Padilla at 3; BOE Exhibit D, Second V.S. Gabriel Padilla at 3; BOE Exhibit H, Napoli Dep. Tr. at 9–10; 16.

Denied. See response to BOEPFF 33-36.

BOE PFF38. For example, at TTI, an appointment to return an empty container can only be made if the VOCC authorized TTI to receive the VOCC's empty container. BOE Exhibit D, Second V.S. Gabriel Padilla at 3.

Denied. Respondent renews its objection to reliance upon the Padilla materials.

BOE PFF39. After receiving the invoices for the Containers and demonstrating GSL's difficulties in obtaining appointments to return the Containers, Hapag-Lloyd denied GSL's dispute and held the invoices as valid. BOE Exhibit 3, Hapag-Lloyd RFA at 3.

This proposed finding of fact is too vague and confusing to be admitted or denied as written. Respondent admits that it sent detention invoices for the Containers to GSL. Respondent admits that GSL requested waivers of the invoices, but denies that GSL demonstrated that appointments to return the Containers were unavailable. See, RPFF#27. Respondent admits that it denied GSL's request for a waiver.

BOE PFF40. Hapag-Lloyd reviews disputes via employees (the Reviewer) who are web-trained and taught how to evaluate disputes via a lecture style and quiz format. BOE Exhibit I, Saavedra Dep. Tr. at 9–11.

Admitted.

BOE PFF41. The training has not been updated or renewed since the publication of the Interpretive Rule. Id. at 11.

Admitted.

BOE PFF42. When reviewing a dispute, the Reviewer first analyzes the plain documentation that a disputing party provides. Id. at 6.

Admitted.

BOE PFF43. Then the Reviewer goes to Hapag-Lloyd's operating system and looks to see if there are any remarks or documents attached to the shipment. Id. at 6–7.

Admitted.

BOE PFF44. If the Reviewer determines that the dispute is valid and that the invoice had not yet been cancelled, the Reviewer will then have to request a waiver from a supervisor. Id. at 7, 24.

Admitted.

BOE PFF45. Conversely, if a Reviewer decides that the dispute is invalid, they have autonomy to reject the dispute and hold the invoices as valid. Id. at 7, 24.

Admitted.

BOE PFF46. When reviewing a detention invoice with claims of no appointments, the Reviewer looks at documentation or remarks from their Equipment department “to see if Equipment wrote anything saying to waive a certain date” as well as the revenue screen to ensure that the “overdue” calculator, that computes detention fees, has taken relevant shut-out dates into account. Id. at 12.

Admitted.

BOE PFF47. If the Reviewer finds these calculations to be correct, they will invalidate the dispute and hold the invoices as valid. Id.

Denied. Page 12 of the deposition transcript does not support this statement. No further evidence is necessary.

BOE PFF48. Shut-out dates, according to the Reviewer, are dates where MTOs had no available appointments at all. Id. at 13.

Respondent admits that this proposed finding of fact reflects the deposition testimony, but denies that this accurately reflects Respondent’s understanding and use of the term “shut-out.” See Respondent’s Response to BOE’s Third Interrogatories, Interrogatory #3, BOE Exhibit F at BOE000119.

BOE PFF49. Hapag-Lloyd’s Revenue Dispute department elaborated that the term “shut-out” or “shut out” is used “for a container type at a port as a day on which all terminal operators at that port were not accepting empty returns of that container type during their first shift.” BOE Exhibit

F, Resp. of Hapag-Lloyd, A.G. and Hapag-Lloyd (America) LLC to Bureau of Enforcement's Third Interrogs. Request for Production of Documents at 1–2, FMC Docket No. 21-09.

Admitted.

BOE PFF50. Thus, the Reviewer does not consider situations where an MTO may offer appointments but is not able to provide appointments to certain size or type of containers or where motor carriers are unable to secure appointments due to a high demand. *Id.* at 13–18, 23.

Denied. See Respondent's Response to BOE's Third Interrogatories, Interrogatory #3, BOE Exhibit F at BOE000119; Respondent's Response to BOE's First Interrogatories, Interrogatory #2, BOE Exhibit I at BOE000218. See also Govil Aff., ¶¶6, 9, and 10.

BOE PFF51. This is in contrast to Hapag Lloyd's account of its "unwritten policies" that "if appointments to return equipment are not available on the first shift, [Hapag-Lloyd, A.G.] waives detention for the entire day, even if there are appointments on the second shift." BOE Exhibit J, Answers of Hapag-Lloyd, A.G. and Hapag-Lloyd (America) LLC to Bureau of Enforcement's First Interrogs. at 2, FMC Docket No. 21-09.

Denied. Govil. Aff., ¶10.

BOE PFF52. Hapag-Lloyd denied GSL's disputes and held its invoices as valid on the grounds of whether an MTO offered appointments, and not whether MTOs offered any appointments specific to the size and type of container, nor whether the appointments were unavailable when GSL tried to obtain an appointment. BOE Exhibit I, Saavedra Dep. Tr. at 13–18, 23

Denied. Govil Aff., ¶¶6, 9, and 10.

BOE PFF53. Hapag-Lloyd then denied GSL's disputes and held the invoices as valid by maintaining, for ten out of the eleven disputes, that "Per [their] Equipment department, as Hapag

Lloyd neither controls nor monitors the terminal's appointment system, [Hapag-Lloyd] [was] unable to waive these charges.” BOE Exhibit E, Hapag-Lloyd RFA at 4.

Denied. This PFF quotes only a portion of Respondent's reply to GSL's waiver request. The reason GSL's waiver requests were denied is because Respondent determined that there was no record of the terminal being shut out on the dates in question, i.e., that it was possible for GSL to return the equipment on those dates. See BOE Exhibit A at pp. 000005, 000007, 000009, 000011, 000012, 000015, 000018, 000019, 000020, 000021, and 000023.

BOE PFF54. After the Commission issued the Order of Investigation and Hearing, BOE received additional information with similar fact patterns as the one alleged above. BOE Exhibit K, Hapag-Lloyd Resp. BOE Third Interrogatories E-Mail Addendum at 3–51.

Respondent admits BOE has received allegations similar to those made in the Order of Investigation and Hearing, but cannot admit or deny when such allegations were received by BOE. In this regard, Exhibit K is undated, and it is not clear when the allegations made by Knight Transportation were received by BOE. Respondent denies these other allegations, which have no probative value in this proceeding.

BOE PFF55. A private Complaint was filed that alleged similar activity. See FMC Docket No. 21-10, Orange Avenue Express, Inc. v. Hapag Lloyd, AG; see also BOE Exhibit L V.S. Orange Avenue Express, Inc. (V.S. OAE).

Admitted.

BOE PFF56. Hapag-Lloyd was often quoted using the same language to convey that it did not control the terminal appointment system when holding that its detention invoices were valid. See

BOE Exhibit L, V.S. OAE at ¶8; BOE Exhibit K, Hapag-Lloyd Resp. BOE Third Interrogatories E-Mail Addendum at 1–2.

Admitted, but see response to BOEPFF53.

V. Respondent’s Proposed Findings of Fact

RPFF#1. After the issuance of the interpretative rule, Hapag-Lloyd reviewed its procedures with respect to the assessment and waiver of detention charges, and concluded its existing procedures were in compliance with the interpretative rule. Govil Aff., ¶ 5.

RPFF#2. It was and remains the policy and practice of Hapag-Lloyd to charge detention on empty containers that are not returned to the marine terminal within free time when there is reasonable evidence that it was possible for the motor carrier to return the container. Govil Aff., ¶ 6.

RPFF#3. If appointments are unavailable during the daytime shift at the terminals, it is the policy and practice of Hapag-Lloyd to waive detention for the entire day, even if appointments were available during the terminals’ other shifts. Govil Aff., ¶ 10.

RPFF#4. Hapag-Lloyd waived one day of detention on three of the containers identified in the Order of Investigation and Hearing (“Order”), and waived two days of detention on one of the containers. Govil Aff., ¶18.

RPFF#5. One or more days of detention were waived on these containers because the motor carrier was unable to return these containers on the dates for which detention was waived. Govil Aff., ¶ 18.

RPFF#6. On weekdays during May and June of 2021, an average of 110 empty 20-foot containers per day were returned to terminals used by Hapag-Lloyd. Govil Aff., ¶ 21.

RPFF#7. The only weekdays during May and June of 2021 on which empty 20-foot containers could not be returned to terminals used by Hapag-Lloyd were May 25, May 31, and June 7. Govil Aff., ¶ 21.

RPFF#8. Hapag-Lloyd waived detention charges for all 20-foot containers for May 25, May 31, and June 7. Govil Aff., ¶ 21.

RPFF#9. On weekdays during May and June of 2021, an average of 327 empty 40' HC containers per day were returned to terminals used by Hapag-Lloyd. Govil Aff., ¶ 22.

RPFF#10. The only weekday during May and June of 2021 on which empty 40' HC containers could not be returned to terminals used by Hapag-Lloyd was May 31. Govil Aff., ¶ 22.

RPFF#11. Hapag-Lloyd waived detention charges for all 40' HC containers for May 31. Govil Aff., ¶ 22.

RPFF#12. On weekdays during May and June of 2021, an average of 10 empty 45' containers per day were returned to terminals used by Hapag-Lloyd. Govil Aff., ¶ 23.

RPFF#13. The only weekday during May and June of 2021 on which empty 45' containers could not be returned to terminals used by Hapag-Lloyd was June 14. Govil Aff., ¶ 23.

RPFF#14. Hapag-Lloyd waived detention charges for all 45' containers for June 14. Govil Aff., ¶ 23.

RPFF#15. The empty return matrix provided to motor carriers by Hapag-Lloyd lists preferred or recommended return locations. Govil Aff., ¶ 16.

RPFF#16. Hapag-Lloyd's empty return matrix is not a list of exclusive return locations or instructions to return containers only to the terminals listed on the matrix. Govil Aff., ¶ 16.

RPFF#17. Golden State Logistics (“GSL”) understood empty containers could be returned to locations other than those listed on the Hapag-Lloyd empty return matrix. BOE Exhibit B, p. 35. (BOE 000059).

RPFF#18. GSL returned a total of thirty-six (36) empty Hapag-Lloyd containers to terminals used by Hapag-Lloyd during May and June of 2021. Exhibits C and D hereto.²

RPFF#19. GSL returned two (2) of the eleven (11) containers identified in the Order to terminals not listed on the Hapag-Lloyd empty return matrix as a return location for the date in question. More specifically:

(a) SEGU5670431 (a 40HC) was returned to WBCT on June 17 (Govil Aff., Exhibit #2; Respondent’s Exhibit D), but the Hapag-Lloyd empty return matrix for June 15 lists only YTI as a return location for 40HC equipment on June 17 and the Hapag-Lloyd empty return matrix for June 17 lists only YTI and TTI as return locations for 40HC equipment on that date. BOE Exhibit M, pp. BOE000328 and BOE00329.³

(b) FFAU2104882 (a 40HC) was returned to ITS on June 11 (Govil Aff., Exhibit #2; Respondent’s Exhibit D), but the Hapag-Lloyd empty return matrix for June 9 lists only YTI as a return location for 40HC equipment on June 11 (BOE Exhibit M, p. BOE000304), and the Hapag-Lloyd empty return matrix for June 11 lists only YTI and TTI as return locations for the size of equipment on that date. BOE Exhibit M, p. BOE000321.

² Exhibit C is a joint stipulation of authenticity between the parties. One of the attachments thereto is a report of all empty containers returned by GSL during May and June of 2021. This was produced by GSL in response to Respondents’ subpoena and BOE has stipulated to its authenticity. Exhibit D is an extract from that same report, prepared by counsel, showing only the empty Hapag-Lloyd containers returned by GSL during May and June of 2021.

³ The explanation of the symbols used in the GSL screenshots found in BOE Exhibit M can be found in BOE Exhibit B, pp. BOE000065 to BOE000072.

RPFF#20. GSL returned FCIU8983678 (a 40HC) to YTI on May 26 (Respondent's Exhibit D), but the Hapag-Lloyd empty return matrix for May 25 and May 26 lists only TraPac as a return location for that size of equipment on that date. BOE Exhibit M, BOE000294-000296.

RPFF#21. GSL returned empty Hapag-Lloyd containers not identified in the Order to Hapag-Lloyd designated terminals on dates when it claims it was unable to return equipment of that size identified in the Order to that same terminal. More specifically:

(a) HLBU1845434 (a 40HC) was returned to TraPac on May 26 (Respondent's Exhibit D), but GSL claims it could not obtain an appointment to return 40HCs to TraPac on that date. BOE Exhibit M, p. BOE000294.

(b) UACU5789157 (a 40HC) was returned to TraPac on May 26 (Respondent's Exhibit D), but GSL claims it could not obtain an appointment to return 40HCs to TraPac on that date. BOE Exhibit M, p. BOE000294.

(c) Three (3) 45' containers were returned to YTI on June 21 (HLBU1593348, HLBU8048860, and HLXU9003126 (Respondent's Exhibit D), but GSL claims it could not obtain appointments to return 45' containers to YTI on that date. BOE Exhibit M, p. BOE000346.

RPFF#22. Both HLBU18445434 and UACU5789157 (the two 40HC returned to TraPac on May 26) left ITS loaded on May 25. Respondent's Exhibit D.

RPFF#23. All 40HC containers listed in the Order left YTI loaded on May 24. Id..

RPFF#24. GSL used appointments on May 26 to return two 40HC containers that outgated on May 25, and claimed it could not obtain appointments to return 40HC containers that had outgated on May 24. Respondent's Exhibit D; RPFF#22 and #23.

RPFF#25. Two of the four (4) 40HC containers identified in the Order were returned empty to YTI on June 11, one was returned empty to YTI on June 14, and the other was returned empty to YTI on June 17. Respondent's Exhibit D.

RPFF#26. There is no evidence that GSL attempted to make an appointment to return any of the four (4) 40HC containers identified in the Order at any time between June 1 and June 9, or that appointments were not available during this time period. BOE Exhibit M.

RPFF#27. Appointments were available to return the following equipment types to the following terminals on the dates shown:

Date of Screenshot	Equip. Type	Date/Shift Appt. Available	Terminal Available
Wednesday, May12	20'	May 12, 1st shift	WBCT
Thursday, June 3	20'	June 4, 2nd shift	WBCT
Thursday, June 10	40' HC	June 10, 1st shift	ITS*
		June 10, 1st shift	APMT

*Indicates that no appointment was required, rather than appointments being available.

BOE Exhibit M, pages BOE000287, BOE000299, and BOE000304.

RPFF#28. The terminals listed in RPFF#27 as return locations for June 10 were listed in Hapag-Lloyd's empty return matrix as a return location for that date. BOE Exhibit M, pp. BOE000304.

RPFF#29. GSL did not use any of the available appointments identified in RPFF#25 to return empty Hapag-Lloyd equipment in its possession. Respondent's Exhibit D.

RPFF#30. GSL's data shows terminals other than those on the matrix were accepting Hapag-Lloyd empties on certain dates, further establishing that the matrix is not a list of exclusive locations. More specifically:

(a) WBCT was accepting 20' containers on May 11 and 12, even though this was not reflected on the Hapag-Lloyd empty return matrix. BOE Exhibit M, p. BOE000286 and 000287.

(b) WBCT was accepting 40HC containers on June 14, even though this was not reflected on the Hapag-Lloyd empty return matrix. BOE Exhibit M, p. BOE000321.

RPFF#31. On each day between June 14 and June 18, 2021, as well as on June 21, 2021 (all days GSL claimed there were no appointments available to return 45' equipment to YTI), at least fifty-six (56) (and as many as 141) empty Hapag-Lloyd 45' containers were returned to that terminal by other motor carriers. Govil Aff., ¶ 20 and Exhibit #3 thereto.

RPFF#32. On numerous occasions, empty Hapag-Lloyd equipment of a size that GSL claimed it was unable to return was returned to Hapag-Lloyd designated terminals by other motor carriers.

(a) One (1) 20' container was returned to YTI on each of May 11 and 12 and June 9 and 10, days GSL claimed it could not return that equipment size to that terminal. Govil Aff., Exhibit #3; BOE Exhibit M, pp. BOE000286, 000287, and 000302.

(b) One (1) 20' container was returned to WBCT on each of May 27 and 28, and June 8 and 9, days GSL claimed it could not return that equipment size to that terminal. Govil Aff., Exhibit #3; BOE Exhibit M, pp. BOE000296, 000297, 000301, and 000302.

(c) One (1) 20' container was returned to TraPac on each of June 3 and 4, days GSL claimed it could not return that equipment size to that terminal. Govil Aff., Exhibit #3; BOE Exhibit M, pp. BOE000299 and 000300.

(d) One (1) 40HC container was returned to TraPac on each of May 26 and 27, days GSL claimed it could not return that equipment size to that terminal. Govil Aff., Exhibit #3; BOE Exhibit M, pp. BOE000294 and BOE000296.

(e) One (1) empty 40HC container was returned to APMT, ITS and/or WBCT on each of June 9 and/or 10, days GSL claimed it could not return that equipment size to those terminals. Govil Aff., Exhibit #3; BOE Exhibit M, p. BOE000301 and BOE000304.

(f) One (1) empty 40HC container was returned to each YTI and TTI on June 14, days GSL claimed it could not return that equipment size to those terminals. Govil Aff., Exhibit #3; BOE Exhibit M, p. BOE000331.

(g) One (1) empty 40HC container was returned to each YTI, TTI and WBCT on June 15 and 16, days GSL claimed it could not return that equipment size to those terminals. Govil Aff., Exhibit #3; BOE Exhibit M, pp. BOE000333 and 000335.

RPFF#33. On the following dates on which GSL claimed no appointments were available to return Hapag-Lloyd 40HC equipment (BOE Exhibit M, pp. BOE000301, BOE000302, BOE00034, BOE0003234, and BOE000326), GSL returned empty 40HC containers of other ocean carriers to the terminals on Hapag-Lloyd's empty return matrix in the quantities listed below:

Date	Terminal on HL Matrix	40HC Containers Returned
June 9	WBCT	15
June 10	WBCT	10
	APMT	2
	ITS	1
June 14	TTI	11
June 15	YTI	1
	WBCT	7
	TTI	9
June 16	TTI	15
	WBCT	15

Exhibit C to Respondent's Brief (relevant material highlighted in yellow).

RPFF#34. There is no evidence that GSL was notified by its customers that any of the containers identified in the Order were ready and available for return to the marine terminal. BOE Brief and Exhibits.

VI. Applicable Legal Standards

A. Section 41102(c)

Section 41102(c) of the Shipping Act of 1984, as amended, 46 U.S.C. §41102(c), provides:

A common carrier, marine terminal operator, or ocean transportation intermediary may not fail to establish, observe, and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing, or delivering property.

In the context of terminal practices, the Commission has held that “just and reasonable” means “a practice, otherwise lawful but not excessive and which is fit and appropriate to the end in view.” *Distribution Services, Ltd. v. Trans-Pacific Freight Conference of Japan*, 24 S.R.R. 714 (FMC 1988), citing *Investigation of Free Time Practices -- Port of San Diego*, 9 F.M.C. 525, 547 (1966). The Commission has also held that it is by application to the particular situation or subject matter that words such as “reasonable” take on concrete and specific meaning. *Id.* In other words, reasonableness cannot be determined in the abstract or in a factual vacuum.

B. Interpretative Rule

In 2020, the Commission issued 46 C.F.R. §545.5, an interpretative rule on how Section 41102(c) would be applied to demurrage and detention issues. 85 Fed. Reg. 29638 (May 18, 2020). Section 545.5 is now commonly referred to as “the interpretative rule,” despite being one of several such rules adopted by the Commission. There are several aspects of the interpretative rule that are relevant to this proceeding:

- The interpretative rule does not impose any requirements on regulated entities. The Commission stated: “There are no ‘requirements’ or mandates or dictates in the rule for an ocean carrier to violate.” 85 Fed. Reg. at 29642.
- The Commission declined to adopt bright line rules, favoring a factor-based approach. 85 Fed. Reg. at 29654.
- Nothing in the interpretative rule precludes the Commission from considering factors, arguments, and evidence in addition to those specifically listed in the rule. 46 C.F.R. §545.5(f). This is consistent with the Commission’s approach to reasonableness in *Distribution Services Limited*, i.e., that reasonableness is a highly factual issue that requires consideration of all aspects of a particular situation. This dovetails with the interpretative rule, in which the Commission stated: “each section 41102(c) case would continue to be decided on the particular facts of the case.” 85 Fed. Reg. at 29641.
- The standard under the statute as well as under the interpretative rule is reasonableness, not “exacting precision.” 85 Fed. Reg. at 29648.
- The interpretative rule “presupposes that shippers, intermediaries, and truckers have complied with their customary obligations, including those involving cargo retrieval. Any evidence that these obligations were not met can be raised in the context of a case.” 85 Fed. Reg. at 29652.

VII. Hapag-Lloyd Has Not Violated The Act

With the foregoing legal standards in mind, as indicated above, a closer examination of the facts demonstrates that Hapag-Lloyd has not violated the Act.

A. Hapag-Lloyd Has Established A Reasonable Policy With Respect to Return of Empty Containers

As explained below, Hapag-Lloyd has established a reasonable policy with respect to the return of empty containers.

Hapag-Lloyd’s empty return matrix, which is emailed to motor carriers (and for which updates are available), provides notice to motor carriers of the terminals to which Hapag-Lloyd would prefer empty containers be returned on a given date. The terminals identified in the empty return matrix are, based on the most recent information available to Hapag-Lloyd, accepting

empty Hapag-Lloyd containers on the dates for which they are recommended as return locations. Govil. Aff., ¶ 16.

The empty return matrix provides notice of empty return locations for a minimum of three shifts. See, e.g., BOE Exhibit M, p. BOE000285 (empty return matrix for Tuesday, 5/11/21 provides return locations for four shifts -- both shifts on Tuesday, May 11 and both shifts on Wednesday, May 12). This is consistent with when appointments are released by marine terminal operators, which is generally two to three shifts in advance. BOE Exhibit B, p. BOE000083. Hapag-Lloyd provides at least as much advance notice of empty return locations as the rest of the industry by providing notice of return locations not later than 4 p.m. of the previous day. BOE Exhibit B, p. BOE000048-BOE000049. The advance notice provided by Hapag-Lloyd meets and exceeds the obligation of the ocean carrier under the Uniform Intermodal Interchange and Facilities Access Agreement (“UIIA”) to provide notice of return locations not later than 4 p.m. of the previous day.⁴

In light of the foregoing, even if one were to judge reasonableness in a vacuum and without reference to a specific set of facts, Hapag-Lloyd’s practices with respect to notifying the motor carrier public of return locations are reasonable.

B. Hapag-Lloyd Has Established a Reasonable Policy With Respect to The Waiver of Detention

Contrary to BOE’s allegations, Hapag-Lloyd has established a reasonable policy with respect to the waiver of detention charges.

⁴ UIIA provisions can be raised in individual cases when they bear on the reasonableness of particular detention practices. 85 Fed. Reg. 29649. The fact that the UIIA provides an industry-wide standard and the fact that Hapag-Lloyd complies with that standard strongly supports a conclusion that Hapag-Lloyd’s practices with respect to notification of empty return locations are reasonable.

1. Hapag-Lloyd's Policy

It was the policy of Hapag-Lloyd prior to May of 2020, and remains the policy today, to charge detention on an empty container that is not returned to the marine terminal within free time when there is reasonable evidence that it was possible for the motor carrier to return the empty container. Govil Aff., ¶6.

As explained in the Govil Aff., personnel in the Equipment Control Department of Hapag-Lloyd (America) use information posted on the websites of the marine terminals in Los Angeles and Long Beach with which Hapag-Lloyd contracts for marine terminal services and reports from those terminals to ascertain whether the terminal in question was accepting Hapag-Lloyd equipment of various sizes on a particular date, and whether a particular type of equipment could be returned on that date. They enter this information in the shutout calculator daily. In addition, the shutout calculator may be updated retroactively if it is determined, based on a later review of Hapag-Lloyd's internal records of equipment returned to various marine terminal facilities (for example, in the course of reviewing a dispute by a motor carrier), that it was not possible to return a particular size/type of equipment on a particular day.

Hapag-Lloyd personnel, such as Ms. Saavedra, use the shutout calculator when evaluating disputes. In other words, the reviewer does not have to verify information, as this is being done by the Equipment Control Department. If the shutout calculator indicates that the return of a particular size of equipment was not possible on a particular date, the request of the motor carrier for a waiver or refund is granted.

Moreover, if appointments are unavailable during the daytime shift at the terminals, it is the policy and practice of Hapag-Lloyd to provide motor carriers and Hapag-Lloyd customers

with broad relief by waiving detention for the entire day, even if appointments were available during the terminals' other shifts. Govil Aff., ¶10. It is also Hapag-Lloyd's policy to extend free time when empty equipment cannot be returned during the initial free time allowed, so that customers and motor carriers enjoy the full free time period. Govil Aff., ¶13.

2. Hapag-Lloyd's Policy Is Reasonable

The policy described above is reasonable with the meaning of the Act.

One of the fundamental issues in this proceeding is: what does it mean to say that an appointment was not available? BOE advocates a very narrow definition that would result in a finding that commercially and operationally reasonable conduct is unreasonable under the Act. As explained below, BOE's definition suffers from legal defects and should not be adopted.

BOE's definition of an appointment being unavailable is, in essence, "if an appointment wasn't available when the motor carrier looked for it, then an appointment wasn't available." This definition is inconsistent with the Act, as interpreted by the interpretative rule, in a number of respects.

First, in adopting the interpretative rule, the Commission declined to adopt bright line rules on issues covered by the rule. 85 Fed. Reg. at 29654. BOE nonetheless now urges adoption of a bright line test – could the motor carrier get an appointment when it sought to do so – in determining reasonableness. This is inconsistent with the approach taken by the Commission in adopting the interpretative rule.

In addition, the adoption of BOE's test as to availability (and hence reasonableness) requires the presiding officer and the Commission to disregard whether the motor carrier has complied with its customary obligations and to exclude the other factors, arguments and evidence that it expressly indicated could be introduced in cases such as this. 46 C.F.R.

§545.5(f). Under BOE's approach, there is no consideration of whether the motor carrier was seeking appointments in a timely and responsible matter. There is no consideration of whether other factors may explain or justify the imposition of detention. This is not what was intended by the interpretative rule.

Perhaps most importantly, the approach advocated by BOE is inconsistent with the lynchpin of the interpretative rule – the incentive principle. If a motor carrier can obtain a waiver of detention for any day for which it can produce a screenshot showing no appointments are available, all it has to do is wait until late in the day on the last day of free time (when appointments are likely to be booked⁵), attempt to obtain an appointment it knows is not available, and then produce a screenshot to that effect. If this is what the Act means, then a great deal of the incentive principle of detention has been lost because motor carriers can unilaterally extend free time by waiting until the last minute to seek non-existent appointments.

While BOE's approach has the benefit of clarity and simplicity, reality is not always so clear and simple.⁶ For example, under BOE's approach, an ocean carrier must waive detention for a day for which the motor carrier produces a screenshot showing it couldn't get an appointment. However, BOE's own witness stated approximately 30% of appointments available for the second shift go unbooked. BOE Exhibit G, p. BOE000158. In other words, appointments are almost always available on the second shift. It is not unreasonable for an ocean carrier to deny a request to waive detention when the motor carrier produces a screenshot saying it was unable to get an appointment for the day shift, but other evidence available to the ocean

⁵ Appointments for the first shift tend to be fully booked. BOE Exhibit G, p. BOE000158.

⁶ The complexity of detention issues is demonstrated by the fact that an appeal in FMC Docket No. 1966(I), *TCW, Inc. v. Evergreen Shipping Agency (America) Corporation, & Evergreen Line Joint Service Agreement*, has been pending before the Commission for over 8 months as of the date of this brief. That case involves less than \$600 in detention charges on a single container.

carrier shows that appointments were available on the night shift. Indeed, the assessment of detention in such circumstances would incentivize use of the second shift and thus be consistent with the incentive principle.

There are numerous other factors that go into determining whether a motor carrier was unable to obtain an appointment or return a container. For example, if that motor carrier returned other equipment of the same size/type to a terminal on the same date for which it claims it was unable to do so, this would strongly suggest that it was in fact possible to return the empty container in question. If other motor carriers returned the same size/type of equipment to a terminal, this would strongly suggest that it was in fact possible to return the empty container in question. If the motor carrier returned other equipment of the same size/type and such equipment to a terminal on the same date for which it claims it was unable to do so and the returned equipment belonged to the ocean carrier, this would strongly suggest that it was in fact possible to return the empty container in question. An ocean carrier in possession of such information, could very reasonably deny a request for waiver of detention for that same date.

Similarly, ocean carriers must take into account the efforts made by the motor carrier to obtain an appointment. If the motor carrier waits until late in the free time period and/or late in the day on which it seeks an appointment and then claims appointments were unavailable, should the motor carrier's claim be accepted at face value? What if appointments were available on previous days and/or earlier on the day in question? What if the evidence available to an ocean carrier indicates that motor carriers that checked for appointments promptly after appointments were released were able to obtain appointments? These are the types of facts that the Commission intended be evaluated when considering the reasonableness of a particular practice.

Hapag-Lloyd's practice takes into account the practical considerations outlined above,

and is reasonable in doing so. In general terms, this is evidenced by the fact that going to back to at least January of 2020, Hapag-Lloyd has waived all detention charges (or all detention charges on certain sizes/types of equipment) for a number of dates. See Exhibit #1 to Govil Aff. The amount of detention charges waived by Hapag-Lloyd is substantial. BOE pp. 000380 and BOE000381.

The reasonableness of Hapag-Lloyd's policy, and the necessary nuance involved in analysis of detention invoicing practices, is even more clearly demonstrated by its application to the eleven (11) containers that are the subject of the Order, which are examined in detail in Section VII.C below.

3. BOE's Allegations With Respect To Hapag-Lloyd's Policy Are Baseless

BOE makes a number of allegations with respect to Hapag-Lloyd's policy with respect to detention disputes. These allegations are baseless, as explained in detail below.

BOE incorrectly suggests that Hapag-Lloyd took no specific action in response to the interpretative rule. BOE Brief at p. 19, citing BOE PFF 3-4, 41. Not only does BOE's claim misconstrue its own proposed findings of fact, it is also incorrect. After the issuance of the interpretative rule on detention and demurrage in May of 2020, Hapag-Lloyd reviewed its procedures with respect to the assessment and waiver of detention charges, and concluded its existing procedures were in compliance with the Shipping Act. Govil Aff., ¶ 5. The reason no change was made in Hapag-Lloyd procedures is that none was necessary.

BOE, in addition to incorrectly claiming that Hapag-Lloyd has established no policy, alleges that Hapag-Lloyd denies disputes without regard to the interpretative rule's guidance. BOE Brief at p. 19. As shown above, this is not true.

BOE also incorrectly and misleadingly asserts that Hapag-Lloyd denies disputes and holds invoices valid on the grounds that Hapag-Lloyd does not control the terminal's appointment system. See, e.g., BOE PFF53. As BOE Exhibit E shows, Hapag-Lloyd admitted that the phrase regarding lack of carrier control over the appointment system is included in its responses, but denied that this phrase constitutes the entire response. BOE Exhibit E, p. BOE00014. The complete message Hapag-Lloyd actually sent to the motor carrier was the following:

Good afternoon. Unfortunately, your dispute has been found invalid. Per our Equipment department, as Hapag Lloyd neither controls nor monitors the terminal's appointment system, we are unable to waive these charges. The days where there were truly no appointments available have been exempted from detention. We do not have record of the terminal being shut out during these dates. The invoice remains valid and owing. Thanks and have a great day!

See, e.g., BOE Exhibit A, p BOE000005. (emphasis added). The statement that Hapag-Lloyd does not control the terminal's appointment system, while perhaps distressing to BOE, is factually accurate. More importantly, lack of control over the appointment system is not the reason the dispute was denied. As the underscored wording above indicates, the dispute was denied because Hapag-Lloyd's records were inconsistent with the information provided by the motor carrier and showed that it was possible for the motor carrier to have returned the equipment on the date in question.⁷

BOE claims that Hapag-Lloyd defines a "shut out" as when a terminal has no appointments at all. BOE Brief at 19. BOE PFF 46 and the evidence cited therein do not support this allegation. The correct definition of "shut out" as that term is used by Hapag-Lloyd is found at BOE PFF 49. Unfortunately, BOE misconstrues the meaning of the term "shut out"

⁷ In Section VII.C of this brief below, the nature of the information consulted by Hapag-Lloyd is addressed in detail with respect to the containers identified in the Order.

to suggest that Hapag-Lloyd does not consider limited appointments, lack of appointments, dual transactions, or non-acceptance of Hapag-Lloyd equipment. BOE Brief at 19-20. This misconception appears to be based on the deposition testimony of Ms. Sally Beteta Saavedra, a senior import coordinator at Hapag-Lloyd, regarding the shut-out calculator. (BOE Exhibit H, BOE p. 000195).

BOE's understanding of what Hapag-Lloyd considers when evaluating a detention dispute fails to take into account Ms. Saavedra's testimony that the information in the shut-out calculator IS the type of information that BOE would like Ms. Saavedra to be considering. BOE Exhibit H, BOE p. 000198. A more complete and accurate description of the shut-out calculator, and the information it contains, can be found in the Govil Aff., ¶12. The testimony of Mr. Govil, a management level employee with a greater range of responsibility, provides greater insight into corporate policies than the testimony of Ms. Saavedra, a low-level employee with limited responsibilities who has no one reporting to her. BOE Exhibit H, BOE pp. 000186-000187.

In short, the Hapag-Lloyd dispute resolution personnel are consulting a shut-out calculator that has baked into it the factors that Hapag-Lloyd's detention dispute resolution policy takes into account, the very factors that BOE incorrectly claims are ignored by Hapag-Lloyd.

The final alleged deficiency in Hapag-Lloyd's detention dispute resolution policy is the purported lack of guidance as to the evidence that Hapag-Lloyd requires those disputing charges to submit. BOE Brief at 24. Here, BOE makes no real effort to analyze or evaluate the lack of evidentiary requirements. Instead, it falls back on yet another attack on the language of the Hapag-Lloyd messages to the motor carriers regarding lack of control over terminal appointment systems, an argument disposed of above.

In reality, Hapag-Lloyd has adopted the most liberal evidence policy possible: persons disputing charges can submit whatever evidence they wish. The Hapag-Lloyd dispute form is available on its website, <https://www.hapag-lloyd.com/en/services-information/offices-localinfo/north-america/usa/local-info/customer-dispute-request.html>, and permits anyone wishing to dispute a charge to submit whatever information they wish. As demonstrated by the detailed analysis in Section VII.C below, Hapag-Lloyd evaluates the dispute on the merits of the information submitted and available to it, not on rigid adherence to technical formalities which would result in denials based on whether a specific type of information or document is submitted.

In light of the foregoing, even judging Hapag-Lloyd's practices in a vacuum, BOE has not met its burden of proof with respect to the allegation that Hapag-Lloyd has failed to establish reasonable policies with respect to the resolution of detention disputes.

C. Hapag-Lloyd's Policy Is Reasonable As Applied

Having shown that Hapag-Lloyd has established a reasonable policy and that BOE's attacks on that policy are baseless, we now further demonstrate the reasonableness of Hapag-Lloyd's policy by examining in detail how it was observed and enforced with respect to the containers identified in the Order.

1. *Hapag-Lloyd's Empty Return Matrix Is Not A List Of Required Or Exclusive Return Locations*

One of the bases for the attacks on the reasonableness of Hapag-Lloyd's policy is the misconception that Hapag-Lloyd's empty return matrix is a mandatory instruction to return empty containers only to certain terminals. Three forms of evidence demonstrate that motor carriers are not required to return empty containers to the locations listed on Hapag-Lloyd's empty return matrix.

First, GSL understood containers could be returned to locations other than those on the empty return matrix. RPFF#17.

Second, GSL actually returned containers to terminals not listed on the matrix. GSL returned 2 of the 11 containers identified in the Order to locations not listed on the matrix. RPFF#19. GSL also returned other Hapag-Lloyd empty containers to locations not listed on the matrix during the timeframe in question. RPFF#20.

Third, data provided by GSL indicates that terminals not listed on the Hapag-Lloyd empty return matrix were accepting empty Hapag-Lloyd equipment on dates during the timeframe in question. RPFF#30. This indicates that the terminals listed on the matrix were not the only possible return locations.

The fact that the Hapag-Lloyd empty return matrix is not a list of exclusive return locations is important to understanding the reasonableness of Hapag-Lloyd's policies. Hapag-Lloyd, in evaluating claims for waivers of detention, does not limit its review to whether the terminals listed on its empty return matrix are accepting equipment and/or have appointments. Because Hapag-Lloyd empty equipment can be returned to any terminal at which vessels transporting Hapag-Lloyd cargo call, Hapag-Lloyd quite reasonably considers whether any such terminals are accepting equipment and/or have appointments. BOE's analysis focuses too narrowly on solely those terminals listed on the empty return matrix.

2. The Evidence Indicates Return Of Empty Equipment Was Possible

When examined closely, the screenshots provided by the motor carrier and relied upon by BOE reveal telling information. More specifically, they reveal that appointments to return some of the containers identified in the Order were available on dates prior to the actual return date of the container. These appointments are listed in RPFF#27. There were appointments to return

20' containers available on May 12 and June 4. This means both of the 20-foot containers listed in the Order could have been returned on May 12 and June 4 rather than on May 20 and June 10, as they were. Govil Aff., Exhibit #2. This also means both could have been returned within free time. *Id.* Where appointments were available to return the empty equipment during free time and those appointments were not used, the assessment of detention serves the incentive principle and is reasonable.⁸

There were appointments available to return 40'HC containers on June 10. RPFF#27. All of the 40'HC containers identified in the Order were returned on June 11 or later. Again, this means that some or all of these containers could have been returned within free time. Where appointments were available to return the empty equipment during free time and those appointments were not used, the assessment of detention serves the incentive principle and is reasonable.

Moreover, as noted in RPFF#28, the terminals with appointments available on June 10 were listed on Hapag-Lloyd empty return matrix as return locations on the dates in question.

3. *GSL's Own Actions Demonstrate Return Of Empty Hapag-Lloyd Equipment Was Possible*

The evidence of GSL's return of other empty equipment undermines its claims it was unable to return equipment identified in the Order, and supports the reasonableness of Hapag-Lloyd's actions.

GSL picked up the four 40'HC containers identified in the Order, loaded with cargo, from YTI on May 24. RPFF#23. It picked up two other 40'HC containers (identified in

⁸ Notwithstanding the fact that assessment of detention on the 20-foot containers was reasonable, Exhibit #2 to the Govil Aff. shows the Hapag-Lloyd waived 2 days of detention on the second 20-foot container, further demonstrating the reasonableness of its approach to the issue of detention.

RPFF#21), loaded with cargo, from ITS on May 25. The two containers picked up from ITS on May 25 were returned empty to TraPac on May 26, even though there was substantial free time remaining on those containers. Nonetheless, GSL claimed it was unable to get May 26 appointments to return the 40'HC containers picked up on May 24. RPFF#21.

BOE's position appears to be that since GSL could not get an appointment to return some 40'HC containers on May 26, it is unreasonable to charge detention on those containers. This reading of Section of 41102(c) appears to be based on a simplistic, bright-line reading of the interpretative rule. BOE's approach is flawed.

Rightly or wrongly, the focus of the interpretative rule is the incentive principle, i.e., that detention charges should incentivize the return of equipment. While the interpretative rule may not require following a strict "first out, first back" policy, it is certainly reasonable to conclude that the supply chain benefits when equipment is unloaded and returned to circulation quickly. This goal, which is in harmony with the incentive principle, is served by assessing detention on equipment that a motor carrier does not return because it has chosen instead to return other equipment of the ocean carrier that has been out on delivery for less time. When a motor carrier chooses to use appointments on May 26 to return equipment picked up on May 25 rather than equipment picked up on May 24, that motor carrier has made a decision about which equipment to return. In such circumstances, it cannot fairly be said that appointments were not "available" for the unreturned equipment. Appointments were in fact available for the return of that equipment. The fact the equipment was not returned was not due to a lack of appointments, but due to a decision of the motor carrier. Accordingly, assessment of detention is consistent with the incentive principle and therefore reasonable.

This same practice by GSL – claiming a lack of appointments to return equipment while returning that same size of equipment to the same terminal on the same date – can be seen elsewhere. Between June 9, 2021 and June 16, 2021, GSL returned 86 empty 40’HC containers of other ocean carriers to various marine terminals. RPFF#33. Each of the terminals in question was listed as a return location on Hapag-Lloyd’s empty return matrix for the date in question. *Id.*

In other words, at the same time GSL was claiming it could not return 4 empty Hapag-Lloyd 40’HC containers, it returned 86 empty 40’HC containers to the very same terminals Hapag-Lloyd had designated as preferred return locations for its empty containers. Contrary to the interpretative rule, BOE would have the presiding officer disregard this fact and conclude, solely on the basis of GSL’s claim that it could not obtain an appointment, that the assessment of detention was unreasonable. However, the interpretative rule permits and contemplates that additional or countervailing arguments or evidence be considered. 46 C.F.R. §545.5(f); 85 Fed. Reg. 29641.

The interpretative rule was not intended to solve every detention problem. 85 Fed. Reg. 29639. The interpretative rule provides some general guidance on the evaluation of practices relating to the return of empty equipment, does not address a situation in which a motor carrier has returned 86 empty containers belonging to other ocean carriers, and then claims it is unreasonable for another ocean carrier to charge detention on 4 containers that the motor carrier was “unable” to return.

Section 41102(c) and the interpretative rule cannot and should not be interpreted and applied in a manner that finds the assessment of detention under such circumstances to be unreasonable.

4. *Actions By Other Motor Carriers Demonstrate Return of Empty Equipment Was Possible*

The evidence shows that it was possible for other motor carriers to return certain sizes of Hapag-Lloyd empty equipment to terminals on dates when GSL claimed it was impossible. RPFF#31 and #32. Why were other motor carriers able to return this equipment to the terminals, but GSL was not? It is not unreasonable for an ocean carrier to conclude that it is possible for motor carriers to return certain sizes of equipment to certain terminals on certain dates when motor carriers are in fact doing so. This is particularly true when the quantity of equipment being returned is substantial. RPFF#31.

Under these circumstances, Section 41102(c) and the interpretative rule cannot and should not be interpreted and applied in a manner that finds the assessment of detention under such circumstances to be unreasonable.

5. *GSL's Evidence May Be Unreliable In Certain Situations*

BOE's case with respect to the alleged unavailability of appointments relies exclusively and entirely on the screenshots provided by GSL. BOE's position appears to be that without qualification, when presented with a screenshot that a motor carrier claims demonstrates unavailability of appointments, Hapag-Lloyd's reliance on other indicators of availability constitutes an unreasonable practice. However, as an evidentiary matter, such screenshots may not be reliable or admissible.⁹

⁹ Screenshots are frequently inadmissible in federal court, absent external authentication. See, e.g., *Edwards v. Junior Am. Found.*, 2021 U.S. Dist. LEXIS 78887 (E.D. Tex. Apr. 23, 2021). The authentication problems presented by the use of screenshots are compounded where, as here, the screenshot appears to capture only a portion of the webpage rather than the complete webpage and does not include the URL of the website. These issues are particularly relevant when the screenshot is of a site that relies on content sourced from a third-party website, as is the case here. *Weinhoffer v. Davie Shoring, Inc.*, 23 F.4th 579 (5th Cir. 2022). In this proceeding, the FMC elicited no testimony from the operator of the website in question (Blue Cargo), nor did it question any of the terminal operators from which Blue Cargo purports to source data as to the accuracy of the terminal operator's data on the Blue Cargo site. The only testimony regarding the accuracy of the Blue Cargo data is that of Ms. Cruz, who

The terminal appointment availability provided by GSL comes from a third-party website known as Blue Cargo. BOE Exhibit B, p. BOE 000064. GSL testified that the Blue Cargo can sometimes be inaccurate. BOE Exhibit B, p. BOE000065.

An examination of equipment returned by GSL and the screenshots also provided by GSL support the conclusion that, at least in some situations, those screenshots are not accurate. More specifically, Respondents have identified at least four instances in which GSL returned a certain size of equipment to a terminal that, according to GSL's screenshot, had no appointments:

(i) GESU3644906 (20') – returned to YTI on May 20, but May 19 restriction email from GSL shows no appointments available first shift on May 20. Respondent's Exhibit D and BOE Exhibit M, p. BOE000290.

(ii) TEMU1467361 (20') – returned to YTI on June 10, but June 10 restriction email from GSL shows no appointments available first shift on June 10. Respondent's Exhibit D and BOE Exhibit M, p. BOE000304.

(iii) HLBU1593348 (45') – returned to YTI on June 21, but June 21 restriction email from GSL shows only Pier A has appointments for 45' equipment on June 21. Respondent's Exhibit D and BOE Exhibit M, p. BOE000346.

(iv) HLXU9003126 (45') – returned to YTI on June 18, but June 18 restriction email from GSL shows no appointments available on June 18. Respondent's Exhibit D and BOE Exhibit M, p. BOE000344.

In addition, there is testimony in the record that at least one terminal generally had appointments available during its second shift (BOE Exhibit H, p. BOE000158), which appears

testified that the Blue Cargo data can sometimes be inaccurate. BOE Exhibit B, p. BOE000065. Even when such evidence is authenticated and admitted, evidence contesting authenticity is also admissible and the finder of fact may decide how much weight is to be given to the evidence or even find that the evidence in question is not authentic and is to be disregarded completely. See, Wright and Miller, 31 Fed. Prac. & Proc. Evid. §7104 (2d ed.). While Hapag-Lloyd does not, as a general matter, object to the use of screenshots in connection with waiver requests, it does object to the admission of the GSL-provided screenshots in BOE Exhibit M into evidence in this proceeding both as evidence of the content of the Blue Cargo website at the time and date in question and as to the content of information purportedly source from third-party marine terminal operator websites. Without prejudice to this objection, Hapag-Lloyd does cite to some of the screenshots for certain purposes, such as when they show appointments were available.

to be inconsistent with the screenshots provided by GSL and included in BOE Exhibit M, which generally show no appointments available at that terminal during the second shift. See, e.g., BOE Exhibit M, pp. BOE000290 and BOE000293.

In light of the foregoing, it was reasonable for Hapag-Lloyd to credit its own information over that provided by GSL and to deny requests for waivers of detention based solely on screenshots provided by the motor carrier.

6. *GSL Failed To Fulfill Its Customary Obligations*

In addition to all of the foregoing reasons, Hapag-Lloyd's conduct was reasonable because GSL failed to fulfill its customary obligations.

At least twice in the supplemental information accompanying the interpretative rule, the FMC makes clear that compliance of the shipper or motor carrier with its customary obligations is part of a reasonableness analysis. See, 85 FR at 29647 and 29652. The making of appointments is included in these customary obligations. *Id.*

GSL failed to fulfill these obligations in at least three ways. First, there are periods for which there is no evidence that GSL made any effort whatsoever to secure appointments to return empty containers. For example, in reviewing the emails and screenshots submitted by GSL and contained in BOE Exhibit M, there is no evidence that GSL attempted to make any appointment to return any 40'HC container between June 1 and June 9. BOE Exhibit M. Because the interpretative rule presupposes that the motor carrier has complied with its customary obligations, and GSL failed to do so, the imposition of detention on these containers is reasonable.¹⁰

¹⁰ In addition to the containers identified in the Order, GSL picked up 25 other loaded Hapag-Lloyd containers during May and June of 2021. Respondent's Exhibit E. There is no explanation of why GSL could not have used a "dual move" appointment to return an empty when picking up those loaded containers.

Second, GSL had no standard procedure for seeking or obtaining appointments. BOE Exhibit B, p. BOE000054. Although GSL testified it searches for appointments throughout the day, it has no set schedule for doing so and no documentation of those efforts beyond the screenshots it submitted. BOE Exhibit B., p. BOE000072. There is insufficient evidence to conclude that GSL was reasonably diligent in carrying out its customary duty to make an appointment.

Third, GSL provided screenshots purporting to show appointments were not available. Those screenshots were generally taken between 9:30 a.m. and 1 p.m. on the date in question. BOE Exhibit M. Appointments are released by terminal operators at different times of day. BOE Exhibit B., p. BOE000054. There is a better chance to obtain an appointment if one attempts to make the appointment as soon as appointments are released by the terminal. Exhibit B, p. BOE000056. However, absent written evidence that GSL was attempting to make appointments promptly after those appointments were released by the relevant terminal operator, there is an insufficient basis to conclude that GSL is fulfilling its obligation to diligently attempt to make appointments. Since the interpretative rule presupposes that motor carriers fulfill their obligations, it is reasonable to assess detention on containers when there is no evidence that the motor carrier has done so.

VIII. BOE's Penalty Calculation Is Not Supported By The Facts Or Law

For the reasons set forth above, the presiding officer should conclude that there has been no violation of Section 41102(c). In the event the presiding officer concludes that there has been a violation, any penalty assessed should be minimal. The penalty advocated by BOE is not supported by the facts or the law.

A. Any Violation Is Not Knowing And Willful

As BOE notes at the outset of its Brief, this case involves novel legal issues. BOE Brief at 5. In addition, the interpretative rule, which provides guidance on how Section 41102(c) is to be applied to detention situations, contains no requirements, mandates or dictates which can be violated. 85 Fed. Reg at 29642. It is simply not plausible to claim that there can be a knowing violation in a situation involving novel issues arising under a statutory provision interpreted pursuant to a rule that imposes no specific requirements. If the decision in this case is that Section 41102(c) requires ocean carriers to waive detention whenever presented with a screenshot showing no appointments were available, regardless of whether the carrier has contrary information of the type described above, this would be the first such ruling on this issue. Given that, it cannot be said that Hapag-Lloyd's conduct constituted a knowingly and willful violation of the Act.

B. Any Violation Is Not Continuing

Even if the assessment of detention on the containers in question is a violation of the Act (which Hapag-Lloyd denies), it is not a continuing violation and a penalty cannot be assessed for each day from the date of the invoices to the date of the filing of BOE's brief in this proceeding.

Respondent has not located a single decision in a Commission enforcement proceeding in which a violation of Section 41102(c) was found to be a continuing violation, and BOE cites no authority to support its contention that the alleged violation in this case is continuing. There is a good reason for this – the violation is not continuing.

In this case, Hapag-Lloyd issued invoices for detention. GSL sought to have the detention waived. Hapag-Lloyd denied the waiver request. BOE takes the position that each day since the denial of the request was a separate violation of the Act. If BOE is correct, then every violation of the Shipping Act is a continuing violation. Each time a carrier charges an amount

other than what is in its tariff or service contract, or a shipper pays an amount other than is properly payable under a tariff or service contract, then every day that error goes uncorrected is a continuing violation. However, the Commission has never adopted such a strained and draconian interpretation of the Act. It should not do so here, where the assessment of detention charges does not present any more of a continuing violation than the other types of cases discussed above.

C. Nature, Circumstances, Extent and Gravity of Alleged Violation

BOE gravely exaggerates the nature of the alleged violation. As shown above, Hapag-Lloyd did not ignore the guidance provided by the interpretative rule – it reviewed its pre-existing practices and concluded they were and are consistent with the rule.

BOE also exaggerates the extent of the alleged violation in two respects. First, it tries to suggest (contrary to the facts) that it is Hapag-Lloyd's policy to reject disputes. BOE Brief at 26. This assertion is baseless. The record shows that Hapag-Lloyd waives a considerable amount of detention charges, and waived a portion of the detention charges on the containers covered by the Order. BOE attempts to expand the extent of the alleged violations by citing to unproven allegations made elsewhere. This is inappropriate and speaks to the lack of support for the BOE's case in the factual record developed in this proceeding. Those other allegations are not before the presiding officer in this proceeding, are as yet unproven, and must be disregarded in the context of this proceeding. There should be no inference that others may come forward, as BOE suggests. To consider such allegations in establishing a penalty in this proceeding would be entirely speculative and therefore arbitrary and capricious.

BOE does not appear to directly address the gravity of the alleged violation, but it is important to do so. The violation involves the assessment of a grand total of \$8,125 in detention

charges on 11 containers. BOE hints that these charges somehow impact the supply chain (BOE Brief at 25). This is not true. The containers herein at issue were all returned to a terminal shortly after the expiration of free time (Exhibit #2 to Govil Aff.). The detention charges assessed have not been paid by the motor carrier or passed on to cargo interests by the motor carrier. BOEPFF18 and 19. GSL has not been denied the ability to transport Hapag-Lloyd containers due to non-payment of the invoices. BOE Exhibit B, p. BOE000048. Thus, the gravity of the alleged violation is at worst minor.

D. Culpability and History of Prior Offenses

BOE acknowledges that Hapag-Lloyd has not been the subject of an enforcement action since 1990, so there is little to no history of prior offenses.

Hapag-Lloyd is responsible for its actions but, as explained at length above, its actions in this context are reasonable and do not warrant imposition of a penalty.

E. Deterrence and Future Compliance

As Hapag-Lloyd has been and remains compliant, no meaningful purpose would be served by imposition of a significant penalty.

F. Calculation of the Proposed Penalty

BOE's calculation of the proposed penalty is seriously flawed.

As noted above, BOE cites no precedent for treating the alleged violation as a continuing violation. It cites no precedent and no rationale for using the date of its brief as the cutoff date for the alleged violation. It offers no explanation or rationale for proposing a penalty equal to 10% of the erroneously calculated maximum penalty other than "ease of calculation". BOE Brief at 29. Indeed, despite the fact that the proposed penalty would constitute the largest civil penalty ever imposed by the Commission, it appears to be little more than a "back of the

envelope” estimate. The entire calculation is so cavalier and inexplicable as to be arbitrary and capricious on its face. Moreover, the penalty proposed by BOE is so disproportionate to the nature, extent, and gravity of the violation that it would not withstand judicial review.

G. Ability to Pay

Hapag-Lloyd concedes that it is a substantial company, and does not argue for a lower penalty on the basis of the ability to pay.

H. Other Factors

Under 46 C.F.R. §502.603(b), the Commission is to consider “such other matters as justice requires” when assessing a penalty. In this proceeding, the fair notice doctrine is a factor that is appropriately considered.

The so-called fair notice doctrine is a principle which holds that it is violative of due process to impose a penalty on a party absent notice, such as when a regulation is not sufficiently clear to warn a party about what it is expected of it. See, e.g., *General Electric Co. v. United States EPA*, 53 F.3d 1324, 1328 (D.C. Cir 1995). In that case, the Court of Appeals upheld the EPA’s interpretation of its regulations as prohibiting the distillation of hazardous waste liquids prior to incineration, but held the EPA could not fine General Electric for distilling the liquids because the regulation was not sufficiently clear so as to provide advance notice to GE that its conduct was unlawful.

A similar conclusion was reached in *U.S. v. Chrysler Corp.*, 158 F.3d 1350 (D.C. Cir 1998), where a regulation regarding the positioning of materials during a test for the strength of seatbelts in automobiles was held not to provide sufficient notice of precise requirements. The FMC has applied this same principle in prior proceedings. See, *Sea-Land Service, Inc. – Possible Violation of the Shipping Act of 1984*, 29 S.R.R. 1109 (FMC 2006)(penalty

inappropriate where FMC regulation was not sufficiently clear with respect to form of forwarder signature on certification).

46 C.F.R. §545.5(c)(2)(ii) reads:

Empty Container Return. Absent extenuating circumstances, practices and regulations that provide for imposition of detention when it does not serve it incentivizing purposes, such as when empty containers cannot be returned, are likely to be found unreasonable.

There is nothing in the foregoing regulation which requires an ocean carrier to accept a screenshot provided by a motor carrier on a “no questions asked” basis, or which prohibits an ocean carrier from considering other, more reliable forms of evidence regarding the possibility of empty container return when evaluating a request that detention be waived. If the presiding officer resolves what BOE characterizes as the “novel” issue in this case in a manner that finds a violation of the Act has occurred, it will be the first time Hapag-Lloyd or anyone else in the industry has notice that the Commission will not consider extenuating circumstances or other arguments (as contemplated by the interpretative rule), and that the Commission requires ocean carriers to accept screenshots as definitive evidence without question or qualification. Under such circumstances, it would be a violation of the fair notice doctrine to impose a penalty on Hapag-Lloyd (and certainly, the most significant penalty the Commission has ever imposed)

I. Appropriate Penalty

For all the reasons set forth above, no penalty should be imposed on Hapag-Lloyd in this proceeding. However, should Hapag-Lloyd be found to have violated the Act, an appropriate penalty under the Commission’s regulations would be \$144,452 (11 containers x \$13,132, the maximum penalty for a violation of the Act that was not knowing and willful during 2021).

IX. Conclusion

Hapag-Lloyd has demonstrated that it has established, observed, and enforced just and reasonable practices with respect to the return of empty equipment and the assessment and waiver of detention charges. Given these facts, and the evidence relating to the return of the containers identified in the Order, BOE has not met its burden of proof and the presiding officer should find that Hapag-Lloyd has not violated the Act and should dismiss this proceeding. For all the foregoing reasons, the presiding officer should find that Hapag-Lloyd has not violated the Act and should dismiss this proceeding.

Respectfully submitted,

EXHIBIT A

BEFORE THE FEDERAL MARITIME COMMISSION

HAPAG-LLOYD AG AND HAPAG-LLOYD
(AMERICA) LLC – POSSIBLE VIOLATIONS OF
46 U.S.C., §41102(c)

FMC Docket No. 21-09

**RESPONDENTS' SUBPOENA FOR
ATTENDANCE AT DEPOSITION**

**TO: Golden State Logistics, Inc.
2999 E Pacific Commerce Drive
Rancho, Compton, CA 90221**

Pursuant to FMC Rules 502.131 and 502.143(b)(6), you are hereby commanded to attend a deposition taken by the Respondents, Hapag-Lloyd AG and Hapag-Lloyd (America) LLC in the above-captioned matter. Pursuant to FMC Rule 502.136, "In the event of failure to comply with any subpoena or order issued in connection therewith, the Commission may seek enforcement as provided in § 502.150(b)."

The deposition shall commence on Friday, February 4 at 1:00 pm Eastern Standard Time (10 a.m. Pacific Standard Time), except as otherwise agreed to by the parties. This deposition will be recorded by stenographic means and will be conducted virtually and remotely. Reasonably in advance of the deposition, counsel for Respondents shall provide you or your counsel with the necessary access information to attend the virtual and remote deposition. In accordance with FMC Rule 502.143(b)(6), Golden State Logistics, Inc., shall designate one or more officers, directors, managing agents, or other persons to testify on its behalf concerning the topics set forth in Exhibit 1

attached to this notice.

Pursuant to FMC Rule 502.132, you would normally have ten (10) days after service of the subpoena to move to quash or modify the subpoena, and a reply to such motion would normally be due seven (7) days thereafter. However, this proceeding is being conducted on an expedited basis such that the normal 10-day period to move to quash or modify has been reduced to five (5) days, and the time for a reply has been reduced to four (4) days.

Signed this 31st day of January, 2022.

Erin M. Wirth
Administrative Law Judge

EXHIBIT 1
DEFINITIONS

1. The following rules of construction should apply to all discovery requests:
 - a. "All" should be construed to include the collective as well as the singular and shall mean "each," "any," and "every." The terms "any," "all," "each" and "every" should be understood in either their most or least inclusive sense as necessary to bring within the scope of the Request all responses that might otherwise be construed to be outside of the scope.
 - b. "And" and "or" should be construed so as to require the broadest possible response. If, for example, a request calls for information about "A or B" or "A and B," You should produce all information about A and all information about B, as well as all information about A and B collectively. In other words, "or" and "and" should be read as "and/or."
 - c. "Any" shall be construed to mean "any and all."
 - d. "Including" shall be construed to mean "without limitation." "Including" is used to emphasize certain types of documents requested and should not be construed as limiting the request in any way.
 - e. The use of the singular form of any word includes the plural and vice versa.
 - f. Each of the words "concerning," "reflecting," "relating," "supporting," "negating," "evidencing" and "referring" shall be defined to include the common meanings of all those terms, and shall include indirect as well as direct references to the subject matter set forth in the Request.
2. "GSL" means Golden State Logistics, Inc.
3. "Respondents" means Hapag-Lloyd AG and Hapag-Lloyd (America) LLC.

4. "Standard Operating Procedure" means the normal business practices and policies followed, and the normal means of carrying out business operations, with respect to the subject matter set forth in the Areas of Examination attached hereto.

5. "Subject Containers" means the ocean shipping containers bearing the following container numbers, which are the subject of FMC Docket No. 21-09:

GESU3644906
TEMU1467361
FFAU2104882
FFAU2094681
SEGU5670431
HLBU1593348
HLXU9003126
HLBU8048860
HLBU8039554
HLBU8038687
HAMU1302165

6. "You" or "Your" means Golden State Logistics, Inc., and its officers, directors, employees, affiliates, associates, agents, attorneys, parents, subsidiaries, divisions, predecessors, successors, committees, and all other persons or entities acting or purporting to act on its behalf or direction.

AREAS OF EXAMINATION

1. Your Standard Operating Procedure for making and utilizing appointments with marine terminals for the return of empty containers, and the extent to which said Standard Operating Procedure was followed with respect to the Subject Containers.

2. The information You provided to Respondents regarding the unavailability of appointments with marine terminals for the return of the Subject Containers.

3. Your understanding of the information provided to You by Respondents regarding the marine terminal(s) to which the Subject Containers could or should be returned.

4. Your Standard Operating Procedure for delivering loaded containers and returning empty containers, and the extent to which said Standard Operating Procedure was followed with respect to the Subject Containers.

5. The following aspects of Your business operations: (a) the number of drivers that transport cargo under Your authority; (b) whether said drivers are employees or independent contractors; (c) your normal hours of operation; and (d) the geographic regions in which You operate.

6. Your Standard Operating Procedure for arbitrating disputes under the Uniform Intermodal Interchange and Facilities Access Agreement (“UIIA”).

DOCKET NO. 21-09

**HAPAG-LLOYD, A.G. and HAPAG-LLOYD
(AMERICA) LLC. —POSSIBLE VIOLATIONS OF
46 U.S.C. § 41102(c)**

AFFIDAVIT OF SANDEEP GOVIL

1. My name is Sandeep Govil. I am the Director of Revenue Management at Hapag-Lloyd (America) LLC.

2. Hapag-Lloyd (America) LLC is a wholly-owned subsidiary of Hapag-Lloyd AG (“HLAG”) and acts as the U.S. general agent of HLAG. Hapag-Lloyd (America) is responsible for carrying out the business of HLAG in the United States, including collecting detention on behalf of HLAG in accordance with the tariffs and service contracts of HLG.

3. As Director of Revenue Management, I am responsible for establishing demurrage and detention terms and ensuring that lawfully applicable charges are fully collected by Hapag-Lloyd (America). In that capacity, I am familiar with the policies and procedures established by HLAG and followed by Hapag-Lloyd (America) with respect to the imposition, collection, and waiver of detention charges on behalf of HLAG.

4. Detention is the charge that is assessed to the motor carrier when it fails to return an empty HLAG container to the marine terminal or other facility within the free time allowed for its to do so.

5. After the issuance of the FMC's interpretative rule on detention and demurrage in May of 2022, Hapag-Lloyd management reviewed the company's procedures with respect to the assessment and waiver of detention charges, and concluded its existing procedures were in compliance with the U.S. Shipping Act of 1984, as amended.

6. It was and remains the policy and practice of HLAG to charge detention on an empty container that is not returned to the marine terminal within free time when there is reasonable evidence that it was possible for the motor carrier to return the empty container.

7. As evidence of this policy, I have attached as the first portion of Exhibit #1 hereto an Excel spreadsheet showing the days on which HLAG waived detention charges at the Ports of Los Angeles and Long Beach between January 1, 2020 and April 21, 2021. Attached as the second portion of Exhibit 1 is a spreadsheet known as the shutout calculator, which shows the days and sizes/types of equipment for which HLAG waived detention charges at the Ports of Los Angeles and Long Beach between March of 2021 and the present.

8. As the materials set forth in Exhibit #1 demonstrate, in 2021 HLAG waived detention charges for 20' dry containers on [REDACTED] days, for 40'HC containers on [REDACTED] days, and for 45' dry containers on [REDACTED] days.

9. Prior to May of 2021, if any size/type of equipment could not be returned, detention was waived on that date for all sizes/types of equipment. Since July of 2021, HLAG waives detention only for those sizes/types of equipment that could not be returned on a particular day.

10. If appointments are unavailable during the daytime shift at the terminals, it is the policy and practice of HLAG to provide motor carriers and HLAG customers with broad relief by waiving detention for the entire day, even if appointments were available during the terminals' other shifts.

11. The Shutout Calculator is updated daily by personnel in the Equipment Control Department of Hapag-Lloyd (America) as part of the normal equipment control and detention procedures of Hapag-Lloyd (America), and as explained below is relied upon by Hapag-Lloyd (America) in conducting business operations.

12. Hapag-Lloyd (America) personnel in the Equipment Control Department use (a) information posted on the websites of the marine terminals in Los Angeles and Long Beach with which HLAG contracts for marine terminal services; and (b) reports from those terminals received via email or telephone to ascertain whether the terminal in question was accepting HLAG equipment of various sizes on a particular date, and whether a particular type of equipment could be returned on that date. They enter this information in the shutout calculator daily. In addition, the shutout calculator may be updated retroactively if it is determined, based on a later review of HLAG's internal records of equipment returned to various marine terminal facilities (for example, in the course of reviewing a dispute by a motor carrier), that it was not possible to return a particular size/type of equipment on a particular day.

13. It is also HLAG's policy to extend free time when empty equipment cannot be returned during the initial free time allowed, so that customers and motor carriers enjoy the full free time period.

14. When a motor carrier protests or requests a waiver of detention charges, Hapag-Lloyd (America) personnel responsible for processing these disputes consult and rely on the Shutout

Calculator, which reflects the information described above. If the Shutout Calculator indicates that the return of a particular size of equipment was not possible on a particular date, the request of the motor carrier for a waiver or refund is granted.

15. It is, and has been, the policy of HLAG or Hapag-Lloyd (America) to assess detention charges only when there is reasonable evidence that the motor carrier was able to return empty equipment.

16. Hapag-Lloyd (America) provides any motor carrier serving the Ports of Los Angeles and Long Beach that requests it a matrix of the terminals accepting HLAG empty containers on a particular date to which HLAG would prefer empty equipment be returned. Examples of this matrix can be seen at BOE Exhibit M, pp. 000285-000289. The matrix is not a list of locations to which empty containers must be returned. Motor carriers are always free to return empty HLAG containers to any marine terminal that serves HLAG and is accepting such equipment, even if the terminal is not listed on the matrix for a particular day/shift/type of equipment.

17. Exhibit #2 hereto is a chart prepared based on business records maintained by Hapag-Lloyd in the ordinary course of business, and relied upon in the conduct of business. For each of the eleven (11) containers identified in the Order of Investigation and Hearing, it shows the date the container left the terminal, the date on which the free time for that container ended, and the date on which the container was returned, the terminal to which it was returned, and the number of days of detention (if any) waived by Hapag-Lloyd.

18. As Exhibit #2 hereto shows, Hapag-Lloyd waived one day of detention on three of the containers, and two days of detention on one of the containers. This detention was waived due to the inability of the motor carrier to return these containers on the dates for which detention was waived.

19. Exhibit #3 hereto is a chart prepared based on business records maintained by Hapag-Lloyd in the ordinary course of business, and relied upon in the conduct of business. It shows, by container size/type, the number of empty Hapag-Lloyd containers returned to various marine terminals in Los Angeles and Long Beach on dates in May and June of 2021.

20. Exhibit #3 shows that on each day between June 14 and June 18, 2021, as well as on June 21, 2021 (all days GSL claimed there were no appointments available to return 45' equipment to YTI), at least 56 and as many as 141 empty Hapag-Lloyd 45' containers were returned to that terminal by other motor carriers.

21. A review of business records maintained by Hapag-Lloyd in the ordinary course of business and relied upon in the conduct of business shows that on weekdays during May and June of 2021, an average of 110 empty 20-foot containers per day were returned to terminals used by Hapag-Lloyd. The only weekdays during May and June of 2021 on which empty 20-foot containers could not be returned to terminals used by Hapag-Lloyd were May 25, May 31, and June 7. Hapag-Lloyd waived detention charges for all 20-foot containers for May 25, May 31, and June 7.

22. A review of business records maintained by Hapag-Lloyd in the ordinary course of business and relied upon in the conduct of business shows that on weekdays during May and June of 2021, an average of 327 empty 40' HC containers per day were returned to terminals used by Hapag-Lloyd. The only weekday during May and June of 2021 on which empty 40' HC containers could not be returned to terminals used by Hapag-Lloyd was May 31. Hapag-Lloyd waived detention charges for all 40' HC containers for May 31.

23. A review of business records maintained by Hapag-Lloyd in the ordinary course of business and relied upon in the conduct of business shows that on weekdays during May and June

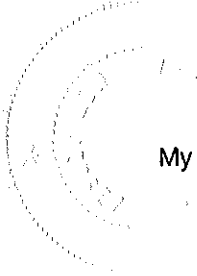

of 2021, an average of 10 empty 45' containers per day were returned to terminals used by Hapag-Lloyd. The only weekday during May and June of 2021 on which empty 45' containers could not be returned to terminals used by Hapag-Lloyd was June 14. Hapag-Lloyd waived detention charges for all 45' containers for June 14.

I declare under penalty of perjury that the foregoing is true and correct.

Sandeep Govil 3/21/2022

**HAPAG-LLOYD, A.G. and HAPAG-LLOYD (AMERICA) LLC. —POSSIBLE
VIOLATIONS OF 46 U.S.C. § 41102(c)**

JOINT STIPULATIONS OF AUTHENTICITY

The Bureau of Enforcement (BOE) and Respondent Hapag-Lloyd, A.G., and Hapag-Lloyd (America) LLC (collectively, Hapag-Lloyd) conferred on February 2, 2022 to discuss the deposition of Sally Beteta Saavedra (Saavedra) on February 3, 2022 at 10:00 am via virtual format. In preparation for the deposition and to streamline the presentation of exhibits, BOE and Hapag-Lloyd (the Parties) jointly stipulate that the emails and invoices submitted as discovery responses to Hapag-Lloyd, are true and correct copies of Saavedra's email correspondence with Kim Cruz of Golden State Logistics—those emails which bear Saavedra's signature block, and/or the email address: usa@service.hlag.com, and are all addressed to Kim Cruz.

In addition to the prior mentioned emails, the Parties jointly stipulate that the invoices, submitted as discovery responses to Hapag-Lloyd and titled with bates number BOE001 Invoices.pdf, are true and correct copies of Hapag-Lloyd's invoices.

Thus, the parties jointly stipulate that the emails and invoices listed in Appendix D are true and correct copies of what they purport to be.

Further, the parties jointly stipulate that Tab #7 of the Excel spreadsheet entitled "Subpoena Request" that was emailed to counsel for Respondents by Ms. Kim Cruz of third-party witness Golden State Logistics on February 8, 2022 contains a list of empty containers returned to marine terminals by Golden State Logistics during May and June of 2021, which list

was prepared based on the business records of Golden State Logistics. A copy of the list contained in Tab #7 of the Excel spreadsheet is attached hereto.

DATED: March 2, 2022
