Docket No 17-04 Regulatory Reform Initiative

Dear Sir

I am writing referring to the above and would like to express our comment.

We, an NVOCC/OTI registered with FMC constantly have to file rate on Tariff to compliance with the rules and regulations causing a company a lot of money on technology, labor, training, time, ineffective and the main issue is no productivity at all.

Our business is to assisting customer to moving freight all around the world. Providing the services shippers agreed to pay for it. A lot of time, we worked on quotation and shipper agreed to pay for it, and notify of any changes. I believe this is all good enough on our business between 2 parties and is legal governed by business agreement law between shipper and carrier. To do another step filing rates, I don't think is necessary and really an extra duplicate work.

I would like you to consider dropping this on NVOCC/OTI.

Yours truly,

Irene Cheung  
Vice President
