Re: Notice of Proposed Rulemaking in its Docket 17-10, Amendments of Regulations Governing
NVO Secretary, Federal Maritime Commission; 800 North Capitol Street, NW; Washington, DC
20573-0001.CC Negotiated Rate Settlements and Negotiated Service Agreements

Dear Sirs:

We are writing to file comments about the above proposed rule making. We are freight forwarders and users of NVOCC services. After discussion of the quotation and filing processes with our NVOCC, we have the following comments.

NSAs – We would like our NVOCC to include in our NRA quotes: other economic terms such as surcharges, credit terms, minimum volume commitments, demurrage/free time, service standards, etc. We find having to look this up online tariffs and agreements burdensome and would believe much easier if included in our NRAs.

NRAs - Our NVOCC also reminds us that we must acknowledge receipt of the NRA, they inform us it is very burdensome to confirm they have done so. We find it much more evident that, if we tender cargo to the NVOCC, we have accepted the rates quoted. And to state again would like to see the NRA have the other economic terms of doing business with the NVOCC as we believe the terms can change with the type of cargo we are tendering and the conditions under which our customers.

Usually the quote has their reference number. We would find it more in order for our NVOCC to have the ability to amend the NRA we have received from them for rate or change in terms due to steamship lines changes in rates or terms. As we know rates change at least quarterly.

Finally as we have stated in previous correspondence we find the need for tariff filing to becoming outdated. We previously had an NVOCC, and since we were smaller found the process burdensome. As a customer we never look at the tariffs we rely on the written quotations.
