Re: Third Supplemental Status Report-FMC Docket No. 25-05

Status Report in Response to August 19, 2025 Order

Complainant: Francis Sheka Kanu

**Respondents: Ejike Dickson Eze dba Ejike International Trade Limited;
SeaLines International; Seamates International, Inc.; and Maersk**

Honorable Judge Ambrow,

Pursuant to the Order dated August 19, 2025, requiring the Complainant to provide an updated status report on or before September 2, 2025, I hereby submit this response concerning the ongoing efforts to resolve the misdelivery of my container **(PONU7794870)**, originally contracted to arrive at Queen Elizabeth Port, Freetown, Sierra Leone, but incorrectly delivered to Pointe Noire, Congo.

On August 30, 2025, I received a written communication (attached herein) from a representative of Respondent Ejike Dickson Eze, confirming that their agent in Pointe Noire has submitted a formal letter from the port terminal to the Chef of the Border Office. This letter is intended to facilitate the authorization process, enabling the agent to gain access to the container. Once access is granted, the agent will be in a position to complete the required customs procedures and initiate the re-exportation process of the container to its intended destination in Freetown, Sierra Leone.

At this stage, all necessary administrative actions are reportedly underway, and only the final customs paperwork remains pending. We remain hopeful that the container will be released shortly and shipping arrangements will follow without further delay.

I again respectfully request the continued cooperation of all Respondents, particularly Maersk and SeaLines International, to assist in the facilitation of this shipment. If this container is successfully re-exported and delivered to Sierra Leone, I am confident this matter can be resolved without the need for further litigation.

Respectfully submitted,

Francis Sheka Kanu/**Complainant**
