Dear Secretary,

I am a recently licensed freight forwarding OTI. In regards to the proposed Amendments to the OTI Regulations (Docket 13-05), I would like to mention that I don't really have any issues with renewing to the FMC on a two year basis, however I think this should be done in a manner which has a minimal financial impact to each OTI. We are a small business working on a tight budget so any further financial burden for upholding our license and bond could really hurt our business. We definitely do not want to see the bond amount increase from \$50,000 to \$75,000 as this will increase the cost of the bond and will negatively affect our annual budget. I would also like to see the license renewal process be as simplified and practical as possible without any fees.

Thank you for all of your considerations about the bottom line of our small business.
