Dear Karen,

After reading on the FMC website about the new proposed regulations to OTI requirements, I am writing to you to strongly oppose the new rulings. OTI's have many rulings that are followed already especially as an NVOCC, of which we just applied for, and this new requirement would put on additional burden of time and cost to our industry that is already facing tough times as with all businesses worldwide.

I am against the change of having to renew our registrations every two years.

I am also against the provision that increases the bond requirements, again another burden and unnecessary cost to us the OTI.

OTI's are simply offering a service to exporters and importers and with many lines losing money and ocean freight rates continually increasing, income for the OTI continues to decrease.

Please pass this information and my thoughts on to the FMC commissioners for consideration.

Kind Regards,

Teri
